Cloud Security Maturity Action Plan (MAP)

Get clear directions for establishing or maturing your software security initiative in the cloud.

Overview

Organizations of all sizes are continually striving to balance modernization, dependability, productivity, and security as they increasingly use public cloud services to host and deliver their application workloads. But whether you're migrating to the cloud or developing cloud-native applications, you need to adapt your software security practices to address the unique opportunities and risks that come with cloud deployment. The Synopsys Cloud Security Maturity Action Plan (MAP) helps you build a detailed plan and roadmap with a prioritized list of recommendations to improve your cloud security strategy as part of your software security initiative (SSI).

Synopsys provides integrated solutions that transform the way you build and deliver software, accelerating innovation while addressing business risk. With Synopsys, your developers can secure code as fast as they write it. Your development and DevSecOps teams can automate testing within development pipelines without compromising velocity. And your security teams can proactively manage risk and focus remediation efforts on what matters most to your organization. Our unmatched expertise helps you plan and execute any security initiative. Only Synopsys offers everything you need to build trust in your software.
