

## **Challenges**

**Carnegie Technologies delivers end-to-end IoT solutions, pre-configured for various industries and designed to work right out of the box. Carnegie Technologies' Longview IoT was purposefully developed as a full set of IoT technologies to provide their customers with a single, secure, and optimized IoT solution to monitor and manage industrial assets.**

**As a startup employing LoRaWAN network architecture on AWS services, Longview was**

**Longview uses GlobalSign IoT Edge End integration on its IoT Identity Platform to manage their Private CA and encrypt data communication**
